

SECRET

DIARY NOTES

25X1A

DD/A

18 and 19 October 1954

1. Called on Philip Young, Chairman, Civil Service Commission, to deliver a letter from the Director which (1) advised that we were classifying Agency security statistics as "secret", (2) requested that further dissemination be limited to those who had a need to know, and (3) asked that such figures not be made public under any circumstances. He agreed and said that he would reply to the Director's letter and advise the President of this arrangement. H

3. Talked to John about the Medical Regulation concerning immunization and asked him to amend it so that he had a measure of control over expenses incurred both in immunization and other expenses incident to immunization.

4. Discussed with John his relationship with the Office of Personnel and the Bureau of Employees Compensation. Told him it was my opinion that we should have one point of contact in CIA with the Bureau inasmuch as it did not make sense to me that the Office of Personnel should forward to the Bureau a part of the information concerning a claim and the Medical Office forward the other. I asked him in the future to allow the Office of Personnel to be this point of contact unless extremely sensitive information were involved.....which I cannot envisage.

5. Obtained General Cabell's approval in principle on the "in casual - out casual" procedure.

6. Talked to General Cabell about ceilings. Told him that the Director's Reserve was gone but that inasmuch as our "on duty" strength was some 800 positions below ceiling I thought that this was fairly inadequate anyway and proposed to go ahead and approve of T/O's where I thought justifications were adequate, adjusting ceilings when we had an opportunity to make an over-all study of the situation. (The Management Staff is in the process of doing this.)

7. Conducted a meeting to prepare for General Cabell's remarks at the Bureau of the Budget on 27 October. Questions were farmed out to the various individuals and answers are to be submitted to [redacted] not later than Thursday, 21 October, at Noon.

8. [redacted] telephoned to say that the Office of the Deputy Director

(Plans) had some 80,000 pages of [REDACTED] which it wanted translated urgently. He requested my approval of tentative arrangements which had been made for the Foreign Documents Division to do this on an overtime basis, the Office of the Deputy Director (Plans) transferring the necessary funds. I approved. (The Comptroller should be advised.)

9. [REDACTED] was by to alert me that he would be receiving a communication requesting that we pay \$10,000 each year to operate the newly established National Indication Center. This amount is twenty-five per cent of the operating cost, the Departments of the Army, Navy, and Air Force bearing the other seventy-five per cent; in addition, the Air Force is furnishing necessary administrative support. (The Comptroller should be alerted.)

11. [REDACTED] called to my attention the fact that we should report the shortage of funds incurred by [REDACTED] to the Department of Justice and let them decide whether or not to prosecute, unless there were security considerations which prevented it. I telephoned Harry Reynolds, advised him of this, and emphasized that in processing [REDACTED] out of the Agency he should make her understand that prosecution might possibly come later.
